29-30 November
2023

SITE VISIT
28 November

VENUE
Hotel Elizabeth,
Trenčín, Slovakia

TAKING FIREPOWER FORWARD ON NATO'S EASTERN FLANK

In partnership
with the Slovak
Armed Forces:

“Fresh-from-the-field expertise, focusing on the problems and solutions”

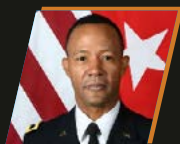

– Major, Estonian Defence Force

BENEFITS OF ATTENDING

- ➔ Gain firsthand insights from artillery chiefs in the region on future fires requirements and modernisation efforts.
- ➔ Understand how the Ukraine war is driving NATO's Eastern flank to rethink the application of long-range precision and mass fires in future combat operations.
- ➔ Hear how the proliferation of UAS and persistent surveillance transforms TTPs to enhance survivability and lethality.
- ➔ Assess how NATO is looking to address the lessons identified by the Ukraine war, particularly as they apply to indirect fires and high-tempo conflict in heavily contested environments.
- ➔ Enhance your understanding of NATO's progress towards the standardisation of 155mm munitions, countering shortages, improving interoperability, and enhancing defence through collaboration. Slovak Armed Forces
